Technical Datasheet

- **Grade Name:** Optical Brightener Masterbatch MB-OB
- **Categories:** A high quality antioxidant masterbatch containing best kinds of additives in polyethylene resin.
- **Processing Methods:** Injection & blow molding
- **Applications:** Blown Film, Injection Parts, Cast Film and Extrusion Process
- **Features:** Good light fastness, Excellent resistance to heat, High chemical stability, Low volatility, Brilliant and bluish whitening effects and good compatibility with most substrates.

Physical Properties			
Properties	Value	Unit	Test Method
Density	0.92	g/cm ³	ISO 1183
Moisture Content	0.1	%	ASTM D570
Addition Rate	1-3	%	Depending on desired effect

Typical Properties: These values are not to be considered as product specifications.
